

TRAFFIC MANAGEMENT CONSULTANTS

Cone and BricsCad (Traffic Management Design) Training

- Cone and Bricscad software is very user friendly and aids the production of Temporary Traffic.
- Management design. Standard layouts can be produced quickly and even the more complex schemes soon fall into place.
- Preparing your drawings for your workforce and clients is an invaluable part of providing better service and safety for the travelling public.
 - COURSE 1. 2 Days: Introduction to CAD + Introduction to CONE, for users with no or very little CAD experience
 - COURSE 2. 1 Day: Introduction to CONE, users must have basic CAD (AutoCAD or Intellicad or Bricscad) experience
 - Class Maximum 2 Candidates
- All training is on individual computers equipped with the latest CONE software and the CAD engine is BricsCad
- AutoCAD and Intellicad users please note that BricsCad is a top quality AutoCAD compatible low cost CAD package. BricsCad has a similar feel to AutoCAD and most Bricscad commands and functions work exactly the same as in AutoCAD. BricsCad reads and writes .DWG files up to DWG 2010
